5 est la moitié  
de 10.

Two vertical columns of four oval shapes each. Each oval is divided by a diagonal line from the top-left to the bottom-right. The top-left half contains black dots, and the bottom-right half contains white dots. The number of dots in each half varies by row. To the right of each oval is a dotted line, followed by a plus sign, another dotted line, an equals sign, and a final dotted line.

Two vertical columns of four oval shapes each, identical in structure to the first set. Each oval is divided by a diagonal line from the top-left to the bottom-right. The top-left half contains black dots, and the bottom-right half contains white dots. The number of dots in each half varies by row. To the right of each oval is a dotted line, followed by a plus sign, another dotted line, an equals sign, and a final dotted line.
